

SWE 401 Software Quality Assurance - Midterm exam (Fall 2026)

Al Yamamah University - College of Engineering - Computer Engineering Department

Sections 01 and 02 - 90 minutes - 40% of the course grade (CLO1, CLO2)

Q1 (CLO1, 10 marks). Name four ISO/IEC 25010 product quality characteristics and give a measurable sub-characteristic for each.

Q2 (CLO1, 10 marks). Contrast quality assurance with quality control using one example from a software project.

Q3 (CLO2, 20 marks). Run a checklist-based inspection of the attached requirements excerpt; record each defect with its type and severity.

Model answers and the marking scheme are kept with the course file.

Fictional demo document for the SAQF evidence workflow.
